	ribonucleopro	otein complex assembly	
		ribosome assembly	
antimicrok	pial humoral immune response mediated	by antimicrobial peptide defense re	sponse to Gram-negative bacterium
		endoplasmic reticulum unfolded pr	otein response
	cellular response to gamma radiation	positive regulation of intrinsic a	apontotic signaling nathway
	response to lithium ion		Apoptotic Signaling patriway
		ER-nucleus signaling pathway	
	skeletal muscle organ developmen	regulation of stem cell differen	ntiation
	protein folding in en	adoplasmic reticulum	
peptide transport		neg	ative regulation of gene expression
(POP NOS NONS)			
		NA catabolic process, nonsense-mediate	ed decay mRNA metabolic process
cotranslational protein targeting to	membrane	'transport and biggyrithe	
		organonitrogen compound biosynthe	cytoplasmic translation
